

Communication to the Membership during the Worksite JLMC Process

An effective communication plan, from start to finish, incorporates the following:

- Notification to the members of the intent to start a worksite JLMC
- Worker survey conducted that identified potential issues to be discussed
- Meeting with workers to discuss the priority of the issues and possible solutions PRIOR TO the worksite JLMC meeting
- Holding a follow up meeting with workers to report back the results
- Maintaining consistent and open communication during each step of the process
