Hey, Local 1000, and happy Wednesday.

I know you're all sitting on the edge of your chair. You know we went to bargaining today. And you want to know what happened. So today was a light day. It was basically setting the table, setting the ground rules for what we're going to do. The director of CalHR came and explained to the bargaining team what they were looking for that was in the Governor's budget. No proposal has been passed.

I do want to remind you the bargaining team has been working on your suggestions that you have sent in for cost saving measures, in addition to the ones they have thought of themselves.

We're in a bit of a hold until we actually get the proposal from the state so that we can react. And so, I know you're anxious. I'm asking you to just hang in there with us. We're working on it. I'll have more as soon as we get an update. I'll make sure I get it out to you.

And I'll talk to you all on Friday.
